TECHNICAL SKILLS

Programming & Data

Python, NumPy, Pandas, Scikit-learn, Data Analysis, Data Visualization

AI / Machine Learning

Machine Learning, Deep Learning, NLP, CNN, RNN/LSTM, Transfer Learning, RAG, LLMs, Prompt Engineering

Web Development

React.js, Node.js, Express.js, JavaScript, REST APIs, MongoDB, Tailwind CSS

Networking

CCNA, TCP/IP, IPv4/IPv6, VLANs, Routing & Switching

Tools & Platforms

Git, GitHub, Streamlit, MS Office, Windows, Internet & Email, File Management, Problem Solving

LANGUAGES

Urdu (Native)
English (Professional Working Proficiency)

Rana Abdul Rehman

BS Information Technology | AI & Full-Stack Development

PROFESSIONAL SUMMARY

Highly organized, detail-oriented, and adaptable professional with a strong foundation in computer science, data handling, and technical problem-solving. Experienced in working with digital tools, software applications, structured information, and technology-driven tasks, with practical exposure to software and AI-based projects. Demonstrates strong analytical thinking, accuracy, communication, teamwork, and the ability to learn new tools and systems quickly. Reliable, responsible, and committed to maintaining high standards of accuracy, efficiency, and professionalism in every task.

EDUCATION

Bachelor of Science in Information Technology (BS IT)

Government College University, Faisalabad

2021 - 2025 | GPA: 3.17/4.00

INTERNSHIP EXPERIENCE

AI Prompt Engineering Intern

August 2026 - September 2026 (Remote)

InAmigos Foundation

- Designed and tested role-based AI prompts across multiple professional contexts (education, HR, project management, career advising) to evaluate how role and context shape AI-generated responses.
- Built structured, multi-step AI prompt workflows for practical tasks such as interview preparation, chaining outputs from one step into the next to produce a complete, usable deliverable.
- Documented and presented prompt-engineering exercises in professional report format for review and knowledge sharing.
- Practiced clear written communication by drafting professional emails, cover letters, and social media content as part of internship deliverables.

CERTIFICATIONS

- Artificial Intelligence & Data Science Training** - Dev Valley Software House
- Full Stack Web Development Training** - Dev Valley Software House
- Full Stack Web Development Course** - NAVTTC
- CCNA / Networking Training** - TEVTA
- Google AI Essentials** - Google, 2026
- MS Office Proficiency Certification** - TEVTA, 2020

PROJECTS

Waste Image Classification using CNN

- Developed a CNN-based Deep Learning model to classify waste images into Cardboard, Glass, and Paper.
- Performed image preprocessing, model training, validation, and evaluation, achieving 96.56% accuracy.

Technologies: Python, TensorFlow/Keras, CNN, Computer Vision

AI-Powered Sentiment Analysis System

- Built a review sentiment analysis application using DistilBERT, Hugging Face Transformers, and Streamlit.
- Classified reviews as Positive, Neutral, or Negative and achieved 93%+ validation accuracy.

Technologies: Python, NLP, Transformers, DistilBERT, Streamlit

AI-Powered RAG Application

- Developed a Retrieval-Augmented Generation (RAG) application for context-aware question answering over custom documents.
- Implemented document processing, embeddings, vector storage, semantic search, and LLM-based response generation.

Technologies: Python, LangChain, ChromaDB, LLMs, RAG

College Information Management System

- Developed a full-stack web application for managing students, attendance, fees, subjects, examinations, date sheets, inventory, and dashboards.
- Implemented frontend, backend APIs, database integration, and responsive user interfaces.

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS
